Math Department Summer Homework

All math students will have a packet to complete as summer homework. The math department will distribute these packets to students in May. Packets are due to the teacher on the first day of school. Students will be given credit for this work. This packet is a review of the material covered in previous classes as preparation for the upcoming level. It is important to keep your skills fresh so that you are prepared on the first day. Students may be tested on the material contained in the packet. Additional packets will be available in the main office over the summer.
